CONFERENCE ORGANIZED BY

IN COLLABORATION WITH

TOWARDS A NETWORK OF EUROPEAN ARCHIVES OF TWENTIETH-CENTURY MUSIC MUSICIANS' CORRESPONDENCE AND INTERACTION BETWEEN ARCHIVES

Coordinator: Paolo Dal Molin
 Università di Cagliari

The study of compositional techniques, historical backgrounds and promotion of twentieth-century music has received considerable impulse from increased public access to the documentation. In the treatment of the musical heritage the authoritative and cutting edge techniques of leading institutions are seen to share certain principles and goals, thanks to the diffusion of archival and scientific models. However, this has come about, and continues to occur, often with little or no synergy between the institutions responsible for conservation. Do the operators and specialised users feel a need for greater interchange between the archives? At what level? Do the desire and the conditions for this to come about exist? If so, in what forms and with what objectives? The main goal of the conference is to create a basis for continuous exchange and effective collaboration among European archives. Problems will be exemplified by considering the specific area of epistolary exchanges between musicians, from the collection of letters to their publication.

The official language of the conference is English

Lo studio delle tecniche compositive, dei contesti storici e della promozione della musica del XX secolo ha ricevuto un considerevole impulso dall'incremento dell'accesso pubblico ai documenti. Nel trattamento del patrimonio documentario musicale le esperienze consolidate e più avanzate mostrano di condividere principi e obiettivi, grazie alla diffusione di modelli archivistici e scientifici. Tuttavia ciò è potuto avvenire, e avviene, spesso con poca sinergia fra gli enti conservatori. Gli operatori e gli utenti specializzati avvertono la necessità di una maggiore interoperabilità fra gli archivi? A quale livello? Esistono la volontà e le condizioni affinché possa realizzarsi? Secondo quali forme e con quali scopi? L'obiettivo principale del convegno è creare i presupposti per lo scambio continuo e la fattiva collaborazione fra gli archivi europei. L'argomento sarà trattato considerando il dominio specifico delle corrispondenze dei musicisti, dalla loro raccolta alla pubblicazione.

La lingua ufficiale della conferenza è l'inglese

In the first two sessions, individuals in charge of some of the major European archives of twentieth-century music will present the state of the art in conservation, description and dissemination of letters and associated sources. The speakers will illustrate the operations carried out on correspondence in their institutions, giving examples from both past and ongoing projects, explaining the reasons for operative choices which may have been adopted as standard procedure or may instead have undergone important revisions.

Debussy’s letters (Gallimard 2005), Schönberg’s correspondences with Berg (Schott 2007) and Universal Edition (in preparation), Nono’s exchanges with Mila (il Saggiatore 2010) and Lachenmann (Olschki 2012) all have different outcomes reflecting specific research objectives, editorial goals and archival constraints. These landmark projects point to the need for shared policies and instruments that involve collaboration between archives and libraries of twentieth-century music.

The introductory address will reconsider aspects of the previous sessions and highlight the current state of interaction between archives. Conference participants will discuss the possibility of a structured network coming into existence to meet the demands of research and to disseminate, in the expanded Europe of today, best practices for the safeguarding and exploitation of the musical documentation produced from the end of the nineteenth century onwards. The possible levels of collaboration range from the aggregation of data or metadata to the definition of a collective programme of dissemination, as well as initiatives fostering communication among operators or the general public.
